DETAILED ACTION

Applicant's election of the Species III including claims 11, 14-16 and 19 in the reply filed on February 20, 2007 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The specification has been checked to the extent necessary to determine the presence of all possible minor errors. However, the applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Art Unit: 2821

2. The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 2821

4. Claims 11, 14-16 and 19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

5. Claim 11 recites "datum of the lamp varying with time are measured continuously or discontinuously" in lines 8 and 9 renders indefinitely whether the lamp data being measured in a continuous or discontinuous manner, since these features required a different circuit structure for supporting a specific measurement.

6. Claims 14-16 and 19 are rejected due to their virtual dependency on the defective claim 11. Correction made to claim 1 would also alleviate unclearness toward claims 14-16 and 19 as well.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. For best understood, claims 11, 14-16 and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Ishizuka (US Pat. 6,163,115).

Regarding claim 11, Ishizuka discloses (Figs. 2 and 3) apparatus and method as well for operation of a gas discharge lamp (7) with a switching transformer having a

Art Unit: 2821

switch (Tr), a converter inductor (T1) and a control means (10) in a control loop for measuring a lamp voltage (R1, R2, 8, 9) and setting a desired power (11), characterized by the following method steps:

values of at least one operational datum (col. 7, lines 27-45) of the lamp (7) varying with time are measured, the measured operational data is compared with calculated operational data, parameters necessary for calculation are adjusted, a duty factor of a supply current (col. 7 lines 45-65) is selected in dependence on the adjusted parameters (col. 8, lines 58-67 and col. 9, lines 1-10).

Regarding claims 14-16 and 19, Ishizuka further disclose parameters of target power initially set for a new lamp on the basis of a charging voltage of the capacitor of the charging circuit when operations are started and will be renewed to a lower target power value in according to a duration after the operation has been started (col. 3, lines 3-50 and col. 9, lines 49-62), wherein the parameters are storable in a memory (col. 8, lines 52-65), in that in steady-state operation the parameters inside the memory are exactly those of the connected lamp (col. 10, lines 1-26), and wherein the operating method for the lamp circuit can be used to implemented a data and video projector (Fig. 4).

Citation of pertinent prior art

9. The prior art made of record and not relied upon is considered pertinent to applicants' disclosure. See attached PTO-892 form.
